

# *Occupational Screening Services* **PRESENTS**

## **OSHA Training Courses** **10 – Hour Construction Industry**

- **Classroom Training**

- ⇒ Worker Emphasis- the classes are presented to workers, therefore we emphasize hazard identification, avoidance, control and prevention, not OSHA standards
- ⇒ Presentations are tailored (as much as possible) to the needs and understanding of the audience.
- ⇒ Site Specific training- use of examples, pictures, scenarios, and videos to demonstrate
- ⇒ Training purpose- This may save their life and help them continue to provide for their family. Safety and health add value to the company, the workplace and their life.

- **Classroom Requirements**

- ⇒ 10 hours of classroom time
- ⇒ One hour each in the following: Introduction to OSHA, Electrical safety and Fall protection
- ⇒ Remainder of the time can be tailored to the company or can be general instruction
- ⇒ Each student is give a binder with classroom material
- ⇒ After the class is concluded, student information is sent in and they will receive a student course completion card

- **Rates**

- ⇒ Flexible rate schedule based on number of participants
- ⇒ On-site training
